

Right-Side Bar Increase

This is the mirror-image increase to the k1fb (knit 1 in the front and back loop of the same stitch) increase.

While that increase creates a little bar that wraps around the bottom of the left stitch, allowing the right stitch to continue the column of knit stitches, this increase wraps the bar around the stitch on the right side.

I have not found a common abbreviation for this increase, so I refer to it as the BincR (Bar Increase Right).

You may be interested in this pattern:

1. Slip the stitch from Left to Right needle knitwise.

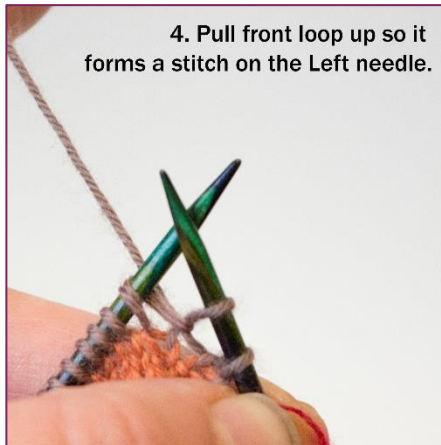

2. Knit into front loop. Remove stitch from Left needle OR move tip of Left needle down to pick up front bar of same stitch. (See Step 3. This method creates one, fluid motion instead of two separate ones.)

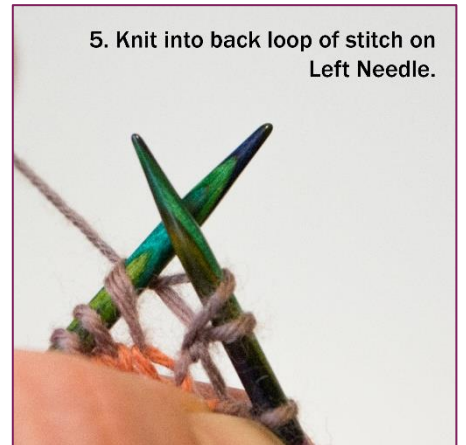

3. Insert tip of Left needle into front loop of stitch below one just worked.

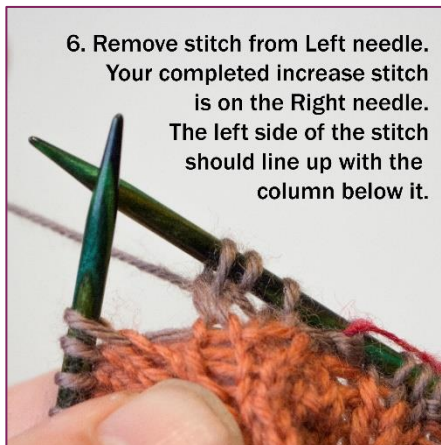

4. Pull front loop up so it forms a stitch on the Left needle.

5. Knit into back loop of stitch on Left Needle.

6. Remove stitch from Left needle. Your completed increase stitch is on the Right needle. The left side of the stitch should line up with the column below it.

7. How it looks after you have worked a couple of rows.
